# 1. Carbon Neutral Information

## 1A Introduction:

APN acknowledges that Climate Change poses a real and material risk to the property sector. With this in mind, we are committed to understanding our climate-related risks and opportunities and managing risks that are material to our business. APN is committed to implementing strategies to decarbonise our investments in line with the recommendations of the Paris Climate Agreement. Some of our key strategies include:

- Quantifying and reporting on our emissions footprint across our investments
- Identifying and quantifying opportunities to enhance environmental performance
- Maximising the roll out of Solar PV across our direct property investments and reduce our dependency on grid sourced energy
- Committing to reporting in line with the voluntary disclosure recommendations of the Task Force on Climate-related Financial Disclosures (TCFD)

APN has committed to quantifying our emission impact and putting in place meaningful targets that will assist us in decarbonising our operations. To further demonstrate our commitment to climate action, we have joined like-minded investors and asset managers in the quest to improve the environment and invest responsibly:

1. Property Council of Australia
2. The Investor Group on Climate Change
3. Responsible Investors Association Australasia

**Table 2. Exclusions**

The following emission sources have been excluded in line with the provisions of the Climate Active Carbon Neutral Standard for Buildings. The impact of excluding these sources is not expected to materially affect the overall total emissions.	Transport and waste transport
Reasons each excluded emission source has been excluded	Transport and waste transport emissions are not included due to a lack of robust data collection and calculation methods, inclusion is not practical or technically feasible at this time.
