1. CARBON NEUTRAL INFORMATION

Description of certification

Current certification covers Australian business operations of Chrystal & Co Pty Ltd, trading as Caterlink, ABN 65 008 680 822, with CY2020 as base year and CY2021 as first year of certification.

Organisation description

Caterlink is a commercial kitchen contractor based in Perth, Western Australia and has been in operation since 1986. The business expanded to include a Victorian presence in 2017 and across Australia and overseas employees over 60 people. The business designs installs and commissions commercial kitchen equipment for a wide of sectors including health care, education, oil & gas, hospitality and defence.

Caterlink sees climate change as one of the main challenges facing all of us, and this is our commitment to lead the change in our industry towards a brighter more sustainable future

2. EMISSION BOUNDARY

Caterlink sees climate change as one of the main challenges facing all of us, and this is our commitment to lead the change in our industry towards a brighter more sustainable future

3. EMISSIONS SUMMARY

Emissions reduction strategy

Reducing emissions is at the core of our business and Caterlink is committed to keeping its emissions low, driving innovation and providing opportunities for our customers to reduce emissions with equipment recommendations that utilise low power, and/or low carbon output. Based on current footprint one of the major sources contributing to the total carbon footprint is electricity. Caterlink is considering to undertake the following measures in CY2022 to reduce its carbon footprint: The best outcome is to reduce consumption. Conducting an energy audit would identify the specific opportunities and challenges in achieving this. Caterlink has begun replacing halogen lighting with LED, will look to applying movement/brightness sensors and/or timers to lighting, applying timers to air-conditioning systems and optimising their temperature set-points (i.e. setting the temperature to be closer to ambient). Longer term, all equipment purchases would be made with energy efficiency in mind. Caterlink has installed solar. For any electricity consumption remaining, GreenPower or Carbon Neutral power will be purchased. Caterlink will develop a more detailed emissions reduction strategy around other emissions sources over the next two years.

Emissions summary (inventory)

Table 2

Emission source category	tonnes CO ₂ -e
Land and Sea Transport (fuel)	129.79
Electricity	117.59
Waste	38.61
Air Transport (km)	21.65
Office equipment & supplies	13.38
Professional Services	8.32
ICT services and equipment	4.05
Water	3.45
Working from home	3.37
Postage, courier and freight	3.06
Cleaning and Chemicals	0.97
Accommodation and facilities	0.83
Refrigerants	0.63
Products	0.14
Stationary Energy	0.05
<i>Total Net Emissions</i>	345.89

Electricity summary

Electricity was calculated using a location-based approach.

Market-based approach summary

Table 4

Market-based approach	Activity Data (kWh)	Emissions (kgCO ₂ -e)	Renewable %
Behind the meter consumption of electricity generated	0	0	0%
Total non-grid electricity	0	0	0%
LGC Purchased and retired (kWh) (including PPAs)	0	0	0%
GreenPower	0	0	0%
Jurisdictional renewables (LGCs retired)	0	0	0%
Jurisdictional renewables (LRET) (applied to ACT grid electricity)	0	0	0%
Large Scale Renewable Energy Target (applied to grid electricity only)	31,893	0	19%
Residual Electricity	133,269	143,691	0%
Total grid electricity	165,162	143,691	19%
Total Electricity Consumed (grid + non grid)	165,162	143,691	19%
Electricity renewables	31,893	0	
Residual Electricity	133,269	143,691	
Exported on-site generated electricity	0	0	
Emission Footprint (kgCO ₂ e)		143,691	

Emission Footprint (TCO₂e)	144
Mandatory LRET renewables	19.31%
Voluntary Renewable Electricity	0.00%
Total renewables	19.31%

Location-based approach summary

Table 5

Location-based approach	Activity Data (kWh)	Emissions (kgCO ₂ -e)
ACT	0	0
NSW	0	0
SA	0	0
Vic	5,066	5,522
Qld	0	0
NT	0	0
WA	160,095	112,067
Tas	0	0

Grid electricity (scope 2 and 3)	165,162	117,589
ACT	0	0
NSW	0	0
SA	0	0
Vic	0	0
Qld	0	0
NT	0	0
WA	0	0
Tas	0	0
Non-grid electricity (Behind the meter)	0	0

4. CARBON OFFSETS

Offsets strategy

Table 6

Offset purchasing strategy:	
Forward purchasing	
1. Total offsets previously forward purchased and banked for this report	zero
2. Total emissions liability to offset for this report	346
3. Net offset balance for this reporting period	346
4. Total offsets to be forward purchased to offset the next reporting period	zero
5. Total offsets required for this report	346

Co-benefits

Caterlink has a related entity based in the Indonesia city of Surabaya that manufactures a range of stainless steel table, shelves, trolleys and sinks and then exports the product internationally. We have chosen to offset using the Rimba Raya project in Borneo to help support the area and align our Indonesian operations with our long term sustainability vision.

Offsets summary

Proof of cancellation of offset units

Table 7

Offsets cancelled for Climate Active Carbon Neutral Certification										
Project description	Type of offset units	Registry	Date retired	Serial number (and hyperlink to registry transaction record)	Vintage	Eligible Quantity (tCO ₂ -e)	Quantity used for previous reporting periods	Quantity banked for future reporting periods	Quantity used for this reporting period claim	Percentage of total (%)
Rimba Raya Biodiversity Reserve Project	VCU	VERRA	22/12/2021	7627-414493288-414493633-VCU-016-MER-ID-14-674-01072014-31122014-1	31/12/2014	346	0	0	346	100%
Total offsets retired this report and used in this report										346
Total offsets retired this report and banked for future reports										0
Additional offsets cancelled for purposes other than Climate Active Carbon Neutral certification										
Project description	Type of offset units	Registry	Date retired	Serial number (and hyperlink to registry transaction record)	Vintage	Eligible Quantity (tCO ₂ -e)	Purpose of cancellation			
NA										
Type of offset units			Quantity (used for this reporting period claim)				Percentage of Total			
Verified Carbon Units (VCUs)			346				100%

6. ADDITIONAL INFORMATION

NA

APPENDIX 1

Excluded emissions

To be deemed relevant an emission must meet two of the five relevance criteria. Excluded emissions are detailed below against each of the five criteria.

Table 9

Relevance test					
Excluded emission sources	<i>The emissions from a particular source are likely to be large relative to the organisation's electricity, stationary energy and fuel emissions</i>	<i>The emissions from a particular source contribute to the organisation's greenhouse gas risk exposure.</i>	<i>Key stakeholders deem the emissions from a particular source are relevant.</i>	<i>The responsible entity has the potential to influence the reduction of emissions from a particular source.</i>	<i>The emissions are from outsourced activities previously undertaken within the organisation's boundary, or from outsourced activities typically undertaken within the boundary for comparable organisations.</i>
NA	NA	NA	NA	NA	NA

APPENDIX 2

Non-quantified emissions for organisations

Table 10

Non-quantification test				
Relevant-non-quantified emission sources	<i>Immaterial <1% for individual items and no more than 5% collectively</i>	<i>Quantification is not cost effective relative to the size of the emission but uplift applied.</i>	<i>Data unavailable but uplift applied. A data management plan must be put in place to provide data within 5 years.</i>	<i>Initial emissions non-quantified but repairs and replacements quantified</i>
