2. CARBON NEUTRAL INFORMATION

Description of certification

This certification is for the Australian business operations of The Trustee for Bobby's Drinks Unit Trust, trading as "Bobby's Drinks", ABN 97 203 169 590, for the projected financial year from 1 July 2022 to 30 June 2023.

Organisation description

Bobby's Drinks (ACN 653 588 571) is a functional soft drink producer based in Victoria, with its Head Office located in inner city Richmond and production facilities in Country Victoria. We are a producer of high grade, gut-health focused soft drinks with a brand as bold in flavour as it is in personality.

The Bobby Vision

Our goal is to allow consumers to enjoy incredible tasting beverages that are better for them and the planet, a brand that celebrates good times always, is for everyone and doesn't settle for the status quo.

The Reason We Exist

We are here to challenge the definitions of what a 'soft drink' means to the everyday consumer, nationally and abroad. Long are the days of trading off tantalizing liquid satisfaction for 'healthier' tasteless drinks that have forgotten about your taste buds. Bobby allows you to make health-conscious choices without sacrificing on flavour with added high-grade prebiotic dietary fibre proven to aid digestion.

"Leading by example in every facet of our category is Bobby's aim - none more important than investing in our climate from day one and joining the growing number of carbon neutral brands that are doing business the right way. This is only the beginning, and we look forward to seeing how far we can push the boundaries as we grow."

3.EMISSIONS BOUNDARY

This is a small organisation certification, which uses the standard Climate Active small organisation emissions boundary. Emission sources can be excluded if they do not occur.

Inside the emissions boundary

All emission sources listed in the emissions boundary are part of the carbon neutral claim.

Quantified emissions have been assessed as relevant and are quantified in the carbon inventory. This may include emissions that are not identified as arising due to the operations of the certified entity however are **optionally included**.

Non-quantified emissions have been assessed as relevant and are captured within the emissions boundary but are not measured (quantified) in the carbon inventory. All material emissions are accounted for through an uplift factor. Further detail is available at Appendix C.

Outside the emissions boundary

Excluded emissions are those that have been assessed as not relevant to an organisation's operations and are outside of its emissions boundary or are outside of the scope of the certification. These emissions are not part of the carbon neutral claim. Further detail is available at Appendix D.

Inside emissions boundary

Quantified

Business travel (air and land transport)

Accommodation

Food & catering

ICT services and equipment

Telecommunications

Office equipment

Computer equipment

Printing and stationery

Copy paper

Mailing services

Legal services

Accounting services

Marketing & distribution

Advertising

Waste

Water

Working from home

Non-quantified

None

Outside emission boundary

Excluded

Cleaning and chemicals

Fuel used in company vehicles

Natural gas

Refrigerants

Office electricity

Data management plan for non-quantified sources

As this is a new business and a projected inventory, Bobby's Drinks will collect as much data as possible for the first full year of operation.

4.EMISSIONS REDUCTIONS

Emissions reduction strategy

Bobby's Drinks commits to becoming Carbon Negative by 2025. We will achieve this by continuously working to reduce our emissions and offsetting more carbon than we are producing. We target a 30% carbon emission reduction by 2027-28, based on the base year 2022-23 actual. As Bobby's Drinks initial inventory is a projected inventory, we are only able to commit to a few initiatives at the present time. A more detailed Emissions Reduction Strategy will be developed after the first full year of operation.

Initiative	FY23	FY24	FY25	FY26	FY27	Target
Switch to a GreenPower or carbon neutral energy plan for working from home offices	x					100% GreenPower or carbon neutral energy in all working from home offices
Purchase only fuel-efficient combustion, or electric company vehicles	x					Vehicle fleet consists of top fuel-efficient vehicles within their class
Prioritize carbon neutral certified professional services	x	x	x	x	x	Using only certified professional services, where available for the services we need, by FY25, and ongoing.
Reduce air travel emissions by using video conferencing facilities for the majority of meetings	x	x	x	x	x	

5.EMISSIONS SUMMARY

Use of Climate Active carbon neutral products and services

No Climate Active carbon neutral products or services were used for this certification period.

Organisation emissions summary

Bobby's Drink does not use office facilities but operates solely with staff working from home. Office-based electricity consumption is not part of this certification boundary and has been excluded (see Appendix D).

Emission category	Sum of total emissions (tCO ₂ -e)
Accommodation and facilities	0.53
Cleaning and chemicals	0
Food	0
ICT services and equipment	0.81
Office equipment & supplies	0.52
Postage, courier and freight	0.87
Professional services	31.10
Transport (Air)	0.94
Transport (Land and sea)	0.09
Waste	0.04
Water	0.06
Working from home	1.19
Total	36.15

Uplift factors

An uplift factor is an upwards adjustment to the total carbon inventory to account for relevant emissions, which can't be reasonably quantified or estimated. This conservative accounting approach helps ensure the integrity of the carbon neutral claim.

Reason for uplift factor	tCO ₂ -e
Compulsory additional 5% of the total to be added for small organisations	1.81
Total of all uplift factors	1.81
Total footprint to offset <i>(total net emissions from summary table + total uplifts)</i>	37.96

6. CARBON OFFSETS

Offsets retirement approach

Forward purchasing	
1. Total emissions footprint to offset for this report	38
2. Total eligible offsets purchased and retired for this report and future reports	38
3. Total eligible offsets retired and used for this report	38
4. Total eligible offsets forward purchased and banked to use toward next year's report	0

Co-benefits

Myamyn conservation project

Two decades ago, sections of Victoria's Annya State Forest were illegally cleared and re-planted with Tasmanian blue gum, an invasive eucalyptus species. By protecting the land against further clearing and re-vegetating it with native flora, this project enhances biodiversity and permanently protects habitat for vulnerable native species - including the southern brown bandicoot, powerful owl and long-nosed potoroo.

Viñales biomass power plant, Chile

This project involves installing a new biomass cogeneration power plant at the Virales sawmill site in the seaside commune of Constitucion, southwest of Santiago. The new biomass energy facility uses waste biomass from sawmills and nearby forestry operations to generate renewable electricity for the sawmill and feeding surplus back into local grid, contributing to Chile's sustainable economic growth.

Eligible offsets retirement summary

Offsets cancelled for Climate Active Carbon Neutral Certification											
Project description	Type of offset units	Registry	Date retired	Serial number (and hyperlink to registry transaction record)	Vintage	Stapled quantity	Eligible quantity (tCO ₂ -e)	Eligible quantity used for previous reporting periods	Eligible quantity banked for future reporting periods	Eligible quantity used for this reporting period	Percentage of total (%)
Biodiverse reforestation carbon offsets ¹ , Myamyn conservation project (Victoria), stapled to		NVCR	27 Jun 2022	VOL008 23304-23341		38	0				
Viñales biomass power plant, Chile	VCUs	VERRA	28 Jun 2022	8788-45418457-45418494-VCS-VCU-259-VER-CL-1-1186-01012016-31122016-0	2016	0	38	0	0	38	100%
Total offsets retired this report and used in this report										38	
Total offsets retired this report and banked for future reports										38	

¹ Biodiverse Carbon Offsets (Myamyn conversation project) are not eligible offset units under Climate Active and have been stapled with an equal number of eligible units

Type of offset units	Quantity (used for this reporting period claim)	Percentage of total
Verified Carbon Units (VCUs)	38	100%

7. RENEWABLE ENERGY CERTIFICATE (REC) SUMMARY

Renewable Energy Certificate (REC) summary

N/A

APPENDIX A: ADDITIONAL INFORMATION

Not applicable

APPENDIX B: ELECTRICITY SUMMARY

Bobby's Drinks does not have an office but operates solely with staff working from home. Office-based electricity consumption is not part of this certification boundary and has been excluded (see Appendix D). Electricity consumed due to working from home is calculated and included in the organisation's emissions summary separately.

APPENDIX C: INSIDE EMISSIONS BOUNDARY

Non-quantified emission sources

The following sources emissions have been assessed as relevant, are captured within the emissions boundary, but are not measured (quantified) in the carbon inventory. These emissions are accounted for through an uplift factor. They have been non-quantified due to one of the following reasons:

1. **Immaterial** <1% for individual items and no more than 5% collectively
2. **Cost effective** Quantification is not cost effective relative to the size of the emission but uplift applied.
3. **Data unavailable** Data is unavailable but uplift applied. A data management plan must be put in place to provide data within 5 years.
4. **Maintenance** Initial emissions non-quantified but repairs and replacements quantified.

Relevant-non-quantified emission sources	(1) Immaterial	(2) Cost effective (but uplift applied)	(3) Data unavailable (but uplift applied & data plan in place)	(4) Maintenance
N/A				

APPENDIX D: OUTSIDE EMISSIONS BOUNDARY

Excluded emission sources

The below emission sources have been assessed as not relevant to an organisation's or precinct's operations and are outside of its emissions boundary. These emissions are not part of the carbon neutral claim. Emission sources considered for relevance must be included within the certification boundary if they meet two of the five relevance criteria. Those which only meet one condition of the relevance test can be excluded from the certification boundary.

Emissions tested for relevance are detailed below against each of the following criteria:

1. **Size** The emissions from a particular source are likely to be large relative to the organisation's electricity, stationary energy and fuel emissions
2. **Influence** The responsible entity has the potential to influence the reduction of emissions from a particular source.
3. **Risk** The emissions from a particular source contribute to the organisation's greenhouse gas risk exposure.
4. **Stakeholders** Key stakeholders deem the emissions from a particular source are relevant.
5. **Outsourcing** The emissions are from outsourced activities previously undertaken within the organisation's boundary, or from outsourced activities typically undertaken within the boundary for comparable organisations.

The emissions cleaning and chemicals, fuel, natural gas and office electricity are deemed mandatory emissions for small organisations. They have been excluded for this certification due to not being used by the organisation.

Emission sources tested for relevance	(1) Size	(2) Influence	(3) Risk	(4) Stakeholders	(5) Outsourcing	Included in boundary?
Cleaning and chemicals	No	No	No	No	No	No
Fuel used by company vehicles	No	No	No	No	No	No
Natural gas	No	No	No	No	No	No
Refrigerants	No	No	No	No	No	No
Office electricity	No	No	No	No	No	No
