2. CARBON NEUTRAL INFORMATION

Description of certification

This certification covers the organisational emissions of Engevity Advisory Pty Ltd (ABN 77 635 581 645) for the period of Financial Year 2022 (1 July 2021 – 30 June 2022).

Organisation description

Engevity Advisory Pty Ltd (ABN 77 635 581 645) creates value through transition by offering innovative thinking, expert guidance, pragmatic advice and smart solutions – leading us to a more sustainable future. Engevity's model is agile, solutions-focused and centred around our people and our client's needs.

We are an Australian owned, professional services organisation committed to supporting our clients to sustainably evolve their organisations with our passion, integrity and the power of our exceptional people. Our experienced team of trusted leading experts brings diverse real-world experience, tackling challenging projects and creating enduring value for clients.

Engevity is an SME with all staff working remotely 100% of all the time from their homes – allowing our staff to work flexibly to actively action work/life balance whilst delivering professional services to our clients on a national basis. Therefore, Engevity does not have any head office buildings, motor vehicles or other typical core assets as such.

3.EMISSIONS BOUNDARY

Inside the emissions boundary

All emission sources listed in the emissions boundary are part of the carbon neutral claim.

Quantified emissions have been assessed as relevant and are quantified in the carbon inventory. This may include emissions that are not identified as arising due to the operations of the certified entity, however are **optionally included**.

Non-quantified emissions have been assessed as relevant and are captured within the emissions boundary, but are not measured (quantified) in the carbon inventory. All material emissions are accounted for through an uplift factor. Further detail is available at Appendix C.

Outside the emissions boundary

Excluded emissions are those that have been assessed as not relevant to an organisation's operations and are outside of its emissions boundary or are outside of the scope of the certification. These emissions are not part of the carbon neutral claim. Further detail is available at Appendix D.

Inside emissions boundary

Quantified

- Accommodation
- Food & catering
- ICT services and equipment
- Printing and stationery
- Postal services
- Clothing
- Taxi and hire car
- Insurance
- Education
- Subscription & periodicals
- Accounting services
- Advertising services
- Banking
- Legal services
- Parking & Tolls
- Transport (air)
- Work from home

Non-quantified

- Refrigerants
- Water
- Waste

Optionally included

N/A

Outside emission boundary

Excluded

N/A

4.EMISSIONS REDUCTIONS

Emissions reduction strategy

Engevity Advisory Pty Ltd is an organisation with all staff working remotely from home 100% of the time. As such, there are no Scope 1 or Scope 2 emissions attributed to this organisation. All of Engevity's emissions are attributed to supply chain (Scope 3) emissions sources. Engevity is committed to working with its supply chain to improve the quality of emissions data as this becomes more available, in order to reduce reliance on expenditure-based figures.

Emissions reduction actions

Engevity commits to reduce Scope 3 emissions by 20% by 2025, compared to a FY21 baseline. This will include the following actions:

- reducing flights by using video conferencing where possible. We expect to reduce emissions from business travel including hotel accommodation by 20% by 2025, relative to our FY21 baseline numbers. This will be monitored through annual certification to Climate Active
- 100% renewable energy by 2030 for electricity of working from home from all staff. This will be proved through the renewable energy purchase invoices.

5.EMISSIONS SUMMARY

Emissions over time

		Emissions since base year	
		Total tCO ₂ -e (without uplift)	Total tCO ₂ -e (with uplift)
Base year/Year 1:	2020–21	10.63	11.16
Year 2:	2021–22	26.56	26.56

Significant changes in emissions

Emission source name	Previous year emissions (t CO ₂ -e)	Current year emissions (t CO ₂ -e)	Detailed reason for change
Accounting services	2.25	5.60	Additional business
WFH	1.54	2.78	Staff number increase and COVID

Use of Climate Active carbon neutral products, services, buildings or precincts

Certified brand name	Product/Service/Building/Precinct used
N/A	N/A

Emissions summary

The electricity summary is available in the Appendix B. Electricity emissions were not calculated as all staff worked from home 100% and as such, electricity use has been included under 'Work from home' category.

Emission category	Sum of scope 1 (tCO ₂ -e)	Sum of scope 2 (tCO ₂ -e)	Sum of scope 3 (tCO ₂ -e)	Sum of total emissions (t CO ₂ -e)
Accommodation and facilities	0.00	0.00	1.72	1.72
Electricity	0.00	0.00	0.00	0.00
Food	0.00	0.00	0.16	0.16
ICT services and equipment	0.00	0.00	0.78	0.78
Postage, courier and freight	0.00	0.00	0.40	0.40
Products	0.00	0.00	0.07	0.07
Professional services	0.00	0.00	18.63	18.63
Transport (air)	0.00	0.00	1.95	1.95
Working from home	0.00	0.00	2.78	2.78
Office equipment and supplies	0.00	0.00	0.07	0.07
Total	0.00	0.00	26.56	26.56

Uplift factors

An uplift factor is an upwards adjustment to the total carbon inventory to account for relevant emissions that cannot be reasonably quantified or estimated. This conservative accounting approach helps ensure the integrity of the carbon neutral claim.

Reason for uplift factor	tCO ₂ -e
N/A	0
Total of all uplift factors	0
Total emissions footprint to offset <i>(total emissions from summary table + total of all uplift factors)</i>	26.56

6. CARBON OFFSETS

Offsets retirement approach

This certification has taken in-arrears offsetting approach. The total emission to offset is 27 t CO₂-e. The total number of eligible offsets used in this report is 27. Of the total eligible offsets used, 0 were previously banked and 27 were newly purchased and retired. 0 are remaining and have been banked for future use.

Co-benefits

As Engevity is active in the Renewable Energy space, supporting the Kavakli Wind Power Plant project was aligned with the core business values. Briza Rüzgar Elektrik Üretim Sanayi ve Ticaret Anonim Şirketi plans to install Kavakli Wind Power Plant, located at Merkez district of Balıkesir Province. Within the scope of the project activity, it is planned to install 16 units of wind turbines with a capacity of 3.3 MW each. The Wind Power will be operational in the third quarter of 2014 with a capacity of 50 MW.

Eligible offsets retirement summary

Offsets retired for Climate Active carbon neutral certification											
Project description	Type of offset units	Registry	Date retired	Serial number (and hyperlink to registry transaction record)	Vintage	Stapled quantity	Eligible quantity retired (tCO ₂ -e)	Eligible quantity used for previous reporting periods	Eligible quantity banked for future reporting periods	Eligible quantity used for this reporting period	Percentage of total (%)
Kavakli Wind Power Plant (GS2682)	VER	GS	10 Nov 2023	GS1-1-TR-GS2682-12-2015-4808-21841-21867	2015	0	27	0	0	27	100%
Total eligible offsets retired and used for this report										27	
Total eligible offsets retired this report and banked for use in future reports									0		
Type of offset units		Eligible quantity (used for this reporting period)					Percentage of total				
Verified Emissions Reductions (VERs)		Delete rows which aren't required					Total percentage from each unit type				

7. RENEWABLE ENERGY CERTIFICATE (REC) SUMMARY

Renewable Energy Certificate (REC) summary

N/A

APPENDIX A: ADDITIONAL INFORMATION

NA

APPENDIX B: ELECTRICITY SUMMARY

N/A

All staff work 100% from home and as such electricity use for this organisation has been included in the Working From Home total.

APPENDIX C: INSIDE EMISSIONS BOUNDARY

Non-quantified emission sources

The following emissions sources have been assessed as relevant, are captured within the emissions boundary, but are not measured (quantified) in the carbon inventory. They have been non-quantified due to one of the following reasons:

1. **Immaterial** <1% for individual items and no more than 5% collectively
2. **Cost effective** Quantification is not cost effective relative to the size of the emission but uplift applied.
3. **Data unavailable** Data is unavailable but uplift applied. A data management plan must be put in place to provide data within 5 years.
4. **Maintenance** Initial emissions non-quantified but repairs and replacements quantified.

Relevant non-quantified emission sources	Justification reason
Refrigerants	Immaterial
Water	Immaterial
Waste	Immaterial

Data management plan for non-quantified sources

There are no non-quantified sources in the emission boundary that require a data management plan.

APPENDIX D: OUTSIDE EMISSIONS BOUNDARY

Excluded emission sources

The below emission sources have been assessed as not relevant to this organisation's operations and are outside of its emissions boundary. These emissions are not part of the carbon neutral claim. Emission sources considered for relevance must be included within the certification boundary if they meet two of the five relevance criteria. Those which only meet one condition of the relevance test can be excluded from the certification boundary.

Emissions tested for relevance are detailed below against each of the following criteria:

1. **Size** The emissions from a particular source are likely to be large relative to the organisation's electricity, stationary energy and fuel emissions.
2. **Influence** The responsible entity has the potential to influence the reduction of emissions from a particular source.
3. **Risk** The emissions from a particular source contribute to the organisation's greenhouse gas risk exposure.
4. **Stakeholders** Key stakeholders deem the emissions from a particular source are relevant.
5. **Outsourcing** The emissions are from outsourced activities previously undertaken within the organisation's boundary, or from outsourced activities typically undertaken within the boundary for comparable organisations.

Excluded emissions sources summary

Emission sources tested for relevance	Size	Influence	Risk	Stakeholders	Outsourcing	Justification
N/A						<p>Size: N/A</p> <p>Influence: N/A</p> <p>Risk: N/A</p> <p>Stakeholders: N/A</p> <p>Outsourcing: N/A</p>
