2. CERTIFICATION INFORMATION

Description of organisation certification

This organisation certification is for the business operations of WOLLEMI-IO PTY LTD, ABN 37 645 993 675. Certification covers all mandatory emissions from the small organisation certification boundary where they are relevant to our business.

This Public Disclosure Statement includes information for FY2022-23 reporting period.

Organisation description

WOLLEMI-IO PTY LTD (ABN 37 645 993 675) is a climate reporting platform for the forestry, land, and agricultural sector. We provide services to large corporations and financial institutions seeking to measure, report, and manage climate risk within their supply chains.

WOLLEMI-IO PTY LTD is committed to reducing the impact of our business operations and have decided to become Climate Active Certified Carbon Neutral as part of our ongoing efforts to lower carbon emissions and improve environmental sustainability.

This carbon emission inventory has been based on the Climate Active Small Organisation fixed emission boundary using an operational control approach.

For the FY23 period, there were no physical premises or offices where business was conducted, with all employees working remotely.

3. EMISSIONS BOUNDARY

This is a small organisation certification, which uses the standard Climate Active small organisation emissions boundary.

Inside the emissions boundary

All emission sources listed in the emissions boundary are part of the carbon neutral claim.

Quantified emissions have been assessed as relevant and are quantified in the carbon inventory. This may include emissions that are not identified as arising due to the operations of the certified entity, however are **optionally included**.

Non-quantified emissions have been assessed as relevant and are captured within the emissions boundary, but are not measured (quantified) in the carbon inventory. All material emissions are accounted for through an uplift factor. Further detail is available at Appendix C.

Outside the emissions boundary

Excluded emissions are those that have been assessed as not relevant to an organisation's operations and are outside of its emissions boundary or are outside of the scope of the certification. These emissions are not part of the carbon neutral claim. Further detail is available at Appendix D.

Inside emissions boundary

Quantified

- Accommodation
- Carbon neutral products and services
- Cleaning and chemicals
- Electricity
- Food
- ICT services and equipment
- Professional services
- Office equipment and supplies
- Postage, courier and freight
- Refrigerants
- Stationary energy and fuels
- Transport (air)
- Transport (land and sea)
- Waste
- Working from home

Non-quantified

- Water

Outside emission boundary

Excluded

NA

4. EMISSIONS REDUCTIONS

Emissions reduction strategy

WOLLEMI-IO PTY LTD is committed to reduce emissions per full-time staff member across its value chain (scope 1, 2, and 3) by at least 10% by 2025, and 50% by 2030 from our FY2023 baseline. We will be using the average total emissions per full-time staff member to track this progress.

Based on gross emissions of 16.93 tCO₂-e and 2 FTEs for the year, our FY2023 baseline is 8.5 tCO₂-e per FTE.

Despite the growth in our team size in the upcoming financial year, we are dedicated to limiting our overall emissions and maintaining our carbon-neutral status by leasing office space in a carbon-zero building.

Moving forward, we plan to further reduce emissions through the following strategies:

- Implementing continuous emissions review and reduction cycles. This includes prioritising partnership with service providers that certified their services as being carbon neutral.
- Encouraging the reduction of employee commuting emissions by providing rewards for public transport usage and supporting the use of electric vehicles where feasible.
- Offsetting business travel flight emissions and encouraging virtual meetings whenever possible.

Emissions reduction strategy	Emissions source	Timeframe	Measures
Leasing office space in a carbon-zero building	Scope 2 & 3	FY2024	Implemented
Prioritizing partnership with service providers that certified their services as being carbon neutral	Scope 3	FY2027	Track the percentage of service providers we have changed to a carbon neutral alternative
Encouraging the reduction of employee commuting emissions by providing rewards for public transport usage and supporting the use of electric vehicles where feasible.	Scope 3	FY2025	Monitor the percentage of staff members commuting using public transport and electric vehicles
Offsetting business travel flight emissions and encouraging virtual meetings whenever possible	Scope 3	FY2025	Monitor air transport (km) for business travel per staff member

5. EMISSIONS SUMMARY

Use of Climate Active carbon neutral products, services, buildings or precincts

N/A

Emissions summary

For the FY23 period, there were no physical premises or offices where business was conducted, with all employees working remotely.

Emission category	Scope 1 (t CO ₂ -e)	Scope 2 (t CO ₂ -e)	Scope 3 (t CO ₂ -e)	Total Emissions (t CO ₂ -e)
Accommodation and facilities	0.00	0.00	0.18	0.18
Cleaning and chemicals	0.00	0.00	0.00	0.00
Climate Active carbon neutral products and services	0.00	0.00	0.00	0.00
Electricity	0.00	0.00	0.00	0.00
Food	0.00	0.00	0.20	0.20
ICT services and equipment	0.00	0.00	0.00	0.00
Postage, courier and freight	0.00	0.00	0.00	0.00
Professional services	0.00	0.00	5.61	5.61
Refrigerants	0.00	0.00	0.00	0.00
Stationary energy (gaseous fuels)	0.00	0.00	0.00	0.00
Transport (air)	0.00	0.00	2.14	2.14
Transport (land and sea)	0.00	0.00	1.94	1.94
Waste	0.00	0.00	5.25	5.25
Working from home	0.00	0.00	0.77	0.77
Office equipment and supplies	0.00	0.00	0.02	0.02
Total	0.00	0.00	16.12	16.12

Uplift factors

An uplift factor is an upwards adjustment to the total carbon inventory to account for relevant emissions that cannot be reasonably quantified or estimated. This conservative accounting approach helps ensure the integrity of the carbon neutral claim.

Reason for uplift factor	tCO ₂ -e
Mandatory 5% uplift for small organisations.	0.80
Total of all uplift factors (tCO ₂ -e)	0.80
Total emissions footprint to offset (tCO₂-e) <i>(total emissions from summary table + total of all uplift factors)</i>	16.93

6. CARBON OFFSETS

Eligible offsets retirement summary

Offsets retired for Climate Active certification

Type of offset units	Eligible quantity (used for this reporting period)	Percentage of total
Verified Carbon Units (VCUs)	17	100%

Project description	Type of offset units	Registry	Date retired	Serial number (and hyperlink to registry transaction record)	Vintage	Stapled quantity	Eligible quantity retired (tCO ₂ -e)	Eligible quantity used for previous reporting periods	Eligible quantity banked for future reporting periods	Eligible quantity used for this reporting period	Percentage of total (%)
Rimba Raya Biodiversity Reserve Project	VCU	Verra	22 May 2024	9900-157294377-157294393-VCS-VCU-263-VER-ID-14-674-01012018-31122018-1	2018	-	17	-	-	17	100%

Co-benefits

The Rimba Raya Biodiversity Reserve Project, an initiative by InfiniteEARTH, aims to reduce Indonesia's emissions by preserving some 64,000 hectares of tropical peat swamp forest. This area, rich in biodiversity including the endangered Bornean orangutan, was slated by the Provincial government to be converted into four palm oil estates. Located on the southern coast of Borneo in the province of Central Kalimantan, the project is also designed to protect the integrity of the adjacent world-renowned Tanjung Puting National Park, by creating a physical buffer zone on the full extent of the ~90km eastern border of the park.

The project also supports the UN Sustainable Development Goals:

- 01: No Poverty,
- 02: Zero Hunger,
- 03: Good Health and Well-being,
- 04: Quality Education,
- 05: Gender Equality,
- 06: Clean Water and Sanitation,
- 07: Affordable and Clean Energy,
- 08: Decent Work and Economic Growth,
- 09: Industry, Innovation and Infrastructure,
- 10: Reduced Inequalities,
- 11: Sustainable Cities and Communities,
- 12: Responsible Consumption and Production,
- 13: Climate Action,
- 14: Life Below Water,
- 15: Life on Land,
- 16: Peace, Justice, and Strong Institutions,
- 17: Partnerships for the Goals, CCB-Biodiversity Gold, CCB-Climate Gold, CCB-Community Gold

7. RENEWABLE ENERGY CERTIFICATE (REC) SUMMARY

Renewable Energy Certificate (REC) summary

N/A

APPENDIX A: ADDITIONAL INFORMATION

N/A

APPENDIX B: ELECTRICITY SUMMARY

For the FY23 period, there were no physical premises or offices where business was conducted, with all employees working remotely.

APPENDIX C: INSIDE EMISSIONS BOUNDARY

Non-quantified emission sources

The following emissions sources have been assessed as relevant, are captured within the emissions boundary, but are not measured (quantified) in the carbon inventory. They have been non-quantified due to one of the following reasons:

1. **Immaterial** <1% for individual items and no more than 5% collectively
2. **Cost effective** Quantification is not cost effective relative to the size of the emission but uplift applied.
3. **Data unavailable** Data is unavailable but uplift applied. A data management plan must be put in place to provide data within 5 years.
4. **Maintenance** Initial emissions non-quantified but repairs and replacements quantified.

Relevant non-quantified emission sources	Justification reason
Water	Immaterial.

Data management plan for non-quantified sources

The data management plan below outlines how more rigorous quantification can be achieved for non-quantified emission sources.

- In FY23, both of our staff members were working from home five days a week. For the upcoming reporting period (FY24), we will work with the landlord of our new shared office space to obtain details on the water usage and the total number of occupants sharing these utilities. With this data, we will be able to put in place more accurate data of our usage.

APPENDIX D: OUTSIDE EMISSIONS BOUNDARY

Excluded emission sources

There are no excluded emission sources of this carbon neutral claim.
