Climate Active Carbon Neutral certification

Public Disclosure Statement

THIS DOCUMENT WILL BE MADE PUBLICLY AVAILABLE

Responsible entity name: LIF PTY LIMITED

Building / Premises name: 28 Margaret Street

Building Address: 28 Margaret Street, Sydney, NSW 2000

Corresponding NABERS Energy

Rating number

OF37301

This building 28 Margaret Street has been Certified Carbon Neutral (Base Building) NABERS against the Australian Government's Climate Active Carbon Neutral Standard for Buildings (the Standard) for the period 06/4/2025 to 05/4/2026.

Total emissions offset	78 tCO2-e
Offsets bought	0.00% ACCUs, 0.00% VCUs, 0.00% CERs, 100.00% VERs, 0.0% RMUs
Renewable electricity	100.00% of electricity is from renewable sources

Emissions Reduction Strategy

28 Margaret Street has achieved a NABERS Energy rating of 4.5 stars without GreenPower.

Expires 5th of April 2026

Reporting Year Period	
The rating period / reporting year	1/02/2024
12 consecutive months of data used to calculate the NABERS Star rating.	to
	31/01/2025

1. Carbon Neutral Information

1A Introduction:

LIF Pty Ltd (ABN 92 099 664 285) is the Trustee for Local Government Property Fund (ABN 38 870 339 380) which is managed by Vision Super Pty Ltd (ABN 50 082 924 561) as trustee for the Local Authorities Superannuation Fund (ABN 24 496 637 884) ('Vision Super'). Vision Super integrates environmental, social, and governance (ESG) considerations into its investment strategy. This approach aims to optimise net long-term risk-adjusted returns for its members.

1B Emission sources within certification boundary

Table 1. Emissions Boundary		
The Building has achieved Carbon	Base Building; or	•
Neutral Certification for the	Whole Building.	
The Responsible Entity has defined a set building's emissions boundary (in terms of geographic boundary, building operations, relevance & materiality) as including the following emission sources		Scope 1: Refrigerants, Gas/Fuels Scope 2: Electricity Scope 3: Gas/Fuels & Electricity, Water, Waste, Wastewater.

Table 2. Declaration of excluded emissions

All emissions sources within the geographic boundary of the building that are excluded from the emissions boundary of this claim are declared below.

Emissions sources not included in this carbon neutral claim	Description & justification of the exclusion
Office tenancy light and power	Office tenancy lighting, power and supplementary air conditioning are excluded as per NABERS minimum energy coverage requirements for base building offices
Tenant managed waste stream	Tenant managed waste streams are not managed by the building owner and are excluded as per NABERS requirements for base building offices

2. Emissions Summary

Table 2. Emissions Source – Summary	t CO ₂ –e
Scope 1: Refrigerants	60.3
Scope 1: Natural gas	0.0
Scope 1: Diesel	0.0
Scope 2: Electricity	0.0
Scope 3: Natural gas	0.0
Scope 3: Diesel	0.0
Scope 3: Electricity	0.0
Scope 3: Waste	13.0
Scope 3: Water and Wastewater	4.2
Other Scope 1,2 and 3 emissions	0.0
Total Emissions	78

^{*}The emissions associated with these Products and Services have been offset on their behalf. A list of these can be found on the Climate Active website:

https://www.climateactive.org.au/buy-climate-active/certified-brands

3. Carbon Offsets Summary

	Table 4. Offsets retired														
						Eligible Quantity				Eligi				Eligible Quantity used	Percentage of
Project Description	Type of offset units	Registry	Date retired	Serial numbers / Hyperlink*	Vintage	Quantity **	(tCO2 -e) (total quantity retired) ***	banked for future reporting periods	for this reporting period claim	total (%)					
Cururos Wind Farm Project	VER	Gold Standard	18/06/2025	GS1-1-CL-GS3567-12-2017-23424-30909-30986 https://registry.goldstandard.org/batch- retirements/details/213929	Jan 01, 2016 — Dec 31, 2020	78	78	0	78	100.0%					
TOTAL Eligible Quantity used for this reporting period cla						this reporting period claim		78							
TOTAL Eligible Quantity banked for future reporting perio						for future reporting periods	0								

^{*} If a hyperlink is not feasible, please send NABERS a screenshot of retirement, or attach as an appendix.

^{**} Quantity is defined as the number of offsets purchased, regardless of eligibility. For example, Yarra Yarra biodiversity credits are not eligible under Climate Active unless they are stapled to eligible offsets. Therefore the quantity of the Yarra Yarra credits could be entered here, however 0 would be put in the eligible quantity column.

^{***} Eligible Quantity is the total Climate Active eligible quantity purchased. For all eligible offsets, this is the same number as per the quantity cell.

4. Renewable Energy Certificate (REC) Summary

Renewable Energy Certificate (REC) summary

The following RECs have been surrendered to reduce electricity emissions under the market-based reporting method.

1. Large-scale Generation certificates	0
(LGCs)*	U

^{*} LGCs in this table only include those surrendered voluntarily (including through PPA arrangements), and does not include those surrendered in relation to the Large-scale Renewable Energy Target (LRET), GreenPower, and jurisdictional renewables.

Table 6. REC information									
Project supported by REC purchase	Eligible units	Registry	Surrender date	Certificate serial number	Accreditation code (LGCs)	REC creation date		Quantity banked for future reporting (MWh)	Location
				Total LGCs su	rrendered this report a	nd used in this report	0		

Appendix A: Electricity Summary

Electricity emissions are calculated using market-based approach

Market-based method

The market-based method provides a picture of a business's electricity emissions in the context of its renewable energy investments. It reflects the emissions intensity of different electricity products, markets and investments. It uses a residual mix factor (RMF) to allow for unique claims on the zero emissions attribute of renewables without double-counting.

Marked Based Approach				
Total renewables (onsite and offsite) (cell D45)	599,005	kWh		
Mandatory * (RET) (cell D32)	95,470	kWh		
LGCs voluntarily surrendered (cell D36+D37)	0	kWh		
GreenPower voluntarily purchased (cell D34)	503,535	kWh		
Onsite renewable energy consumed (cell D41+D43)	0	kWh		
Onsite renewable energy exported (cell D40)	0	kWh		
Total residual electricity (cell D44)	-95,470	kWh		
Percentage renewable electricity – (cell D46)	100.00%			
Market Based Approach Emissions Footprint (cell M44)	-86,878	kgCO₂-e		
Location Based Approach				
Location Based Approach Emissions Footprint (cell L47)	367,580	kgCO₂-e		

Note

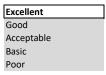

^{*} Voluntary - contributions from LGCs voluntarily surrendered (including via Power Purchase Agreements) and GreenPower purchases.

Appendix B: Waste Data Quality

For all Climate Active Carbon Neutral claims made via the NABERSpathway, the quality of waste data is evaluated to determine the accuracy and integrity of the calculated emissions from the building's waste. Waste data quality is categorised into one of five tiers ranging from poor to excellent.

Emissions from waste make up 16.61% of this claim's total emissions

The quality of waste emissions data for this claim is categorised as:

Appendix C: Refrigerant assessment details

Refrigerant emissions represent the global warming potential of refrigerant gases lost to atmosphere from the building's airconditioning and/or refrigeration equipment. There are two methods for accounting for refrigerant emissions, including:

 $Method \ 1-Estimation \ based \ on \ a \ default \ annual \ leakage \ rate$

Method 2 – Approximation based on records of top-ups"

Refrigerant emissions make up 77.36% of this claim's total emissions. Refrigerant emissions were assessed as follows:

	0					
Assessment method	Refrigerant emissions calculated per method (t CO2-e)					
Method 1	60.34					
Method 2	Method 2 not applied					
Total	60.34					

Appendix D: Screenshots of offsets purchased
